Application/Control Number: 10/616,435

Art Unit: 2871

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Shigeta et al.

Note Example 1 and especially Comparative Example 1 which identically disclose the claimed LC panel and the method comprising a first step of oblique deposition a first layer at an angle of about 60<sup>to</sup> relative to the normal of the substrate, and a second step of oblique deposition a second layer at an angle of about 85° relative to the normal of the substrate in a direction shifted by 90 from the oblique deposition direction in the first step (col. 2, line 55 – col. 4, line 52). Although Shigeta et al do not show the features of the deposited molecules of the SiQ and SiO layers, the liquid crystal molecules being aligned perpendicular at the  $60^{\circ}$  deposition angle relative to the normal of the substrate (30° relative to the plane of the substrate), and the liquid crystal molecules being aligned parallel at the 85° deposition angle relative to the normal of the substrate (5<sup>o</sup> relative to the plane of the substrate), such features are inherently associated with the LC panel and the method of Shigeta et al because of similar material and similar method as those of the instant invention, as evidenced by Matsui et al (deposited molecules 20 in Fig. 5; col. 12, lines 30-46), Crossland et al'273 (col. 2, lines 34-44), and Crossland et al'948 (col. 2, line 67 – col. 3, line 2).

Art Unit: 2871

Any inquiry concerning this communication should be directed to Tai Duong at telephone number (571) 272-2291.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
